RIDING BOOTS

## **Inspired by your passion.**

Constant search for excellence, stylistic innovation and an all-Italian attention to details: these are the values that inspire the creation of our products. A process that interprets the most intensely felt current themes in every facet, from choice of materials to the evolution of design, giving every rider the ability to choose based on their own style, performance level and their own personality. Our EcoRiding line was born from this attention, where Sergio Grasso makes his debut in the use of high performance materials that are alternative to leather. This is another headway in our path to meet every sensitivity and expectation.

## The feel of leather, the performance of microfiber.

Sergio Grasso with **EcoRiding**, offers a planet-friendly line made of innovative, high performance, **non-animal materials**. An alternative to leather that keeps the feel, pleasure and touch of leather. Different microfibers are used in EcoRiding for the upper, the insole and the inner lining, results of a production process in total compliance with environmental regulations.

The special microfiber used for the upper, V-Label certified, is 100% waterproof and perfectly breathable as well as abrasion resistant and antibacterial. Lining and insole, made of the latest generation of microfibers, absorb and eliminate internal moisture, improving the health, comfort and hygiene of the foot. Selection and use in EcoRiding of alternative, advanced and certified materials integrates perfectly with our ongoing search for new stylistic and functional solutions.
